# MISSION OF IMU

---

**Training of highly qualified, competitive personnel using world innovative technologies, in accordance with international education standards based on the requirements of the world labor market, aimed at improving the health and quality of life of the population, through the formation of highly moral and universal principles of medical care.**

# Welcome to IMU!

## Rector's Message

It is challenging to study at the University, but it is extremely interesting at the same time. So if you really care about human life and health and willing to become a highly qualified specialist, the doors of our IMU are always open to you. We need decent people with a kind and sensitive heart who are ready for challenges. Welcome!
